Students

OPEN-ENTRY/OPEN-EXIT COMPETENCY-BASED INSTRUCTION

ROP's mission is to facilitate completion of students' career preparation goals. Where applicable, open-entry/open-exit is recognized as a method available to meet students' varied career preparation goals by allowing students to enroll in an ROP class at any time on a space-available basis and to leave the ROP class at any time with a record of their skill attainment. Open entry/open exit provides for flexible scheduling, individualized instruction, and variable credits.
